OUR VISION & MISSION

VISION

To become the leading company specializing in steel, construction materials and accessories in Vietnam and the region.

MISSION & COMMITMENT

To offer innovative products, services and solutions to improve the safety and the modernity in the Vietnamese construction industry.

To bring practical values to shareholders, employees and the community.

TOWARDS A SAFER LIFE

OUR CULTURE

INTEGRITY

We build our credibility in the business community on the foundation of integrity. We always think, do and take responsibility for what we commit. Integrity serves as a compass not only for organizational activities but also individual attitudes and behaviors.

PASSION

We make distinction by our enjoyment in the job. We inspire our people by giving them meaningful work fitted to their abilities and opportunities to pursue their own interests at work. We remain the sense of responsibility instilled in every task we do.

INNOVATION

We perceive innovation as a driving force for our development; therefore, we continuously strive for the better quality of our offerings and management system. We engage our people in the processes of innovation by encouraging interaction between them and promoting an entrepreneurial and collaborative working environment. We give them responsibility and autonomy in their jobs, and provide them with resources and opportunities to evaluate and execute their ideas.

CARE

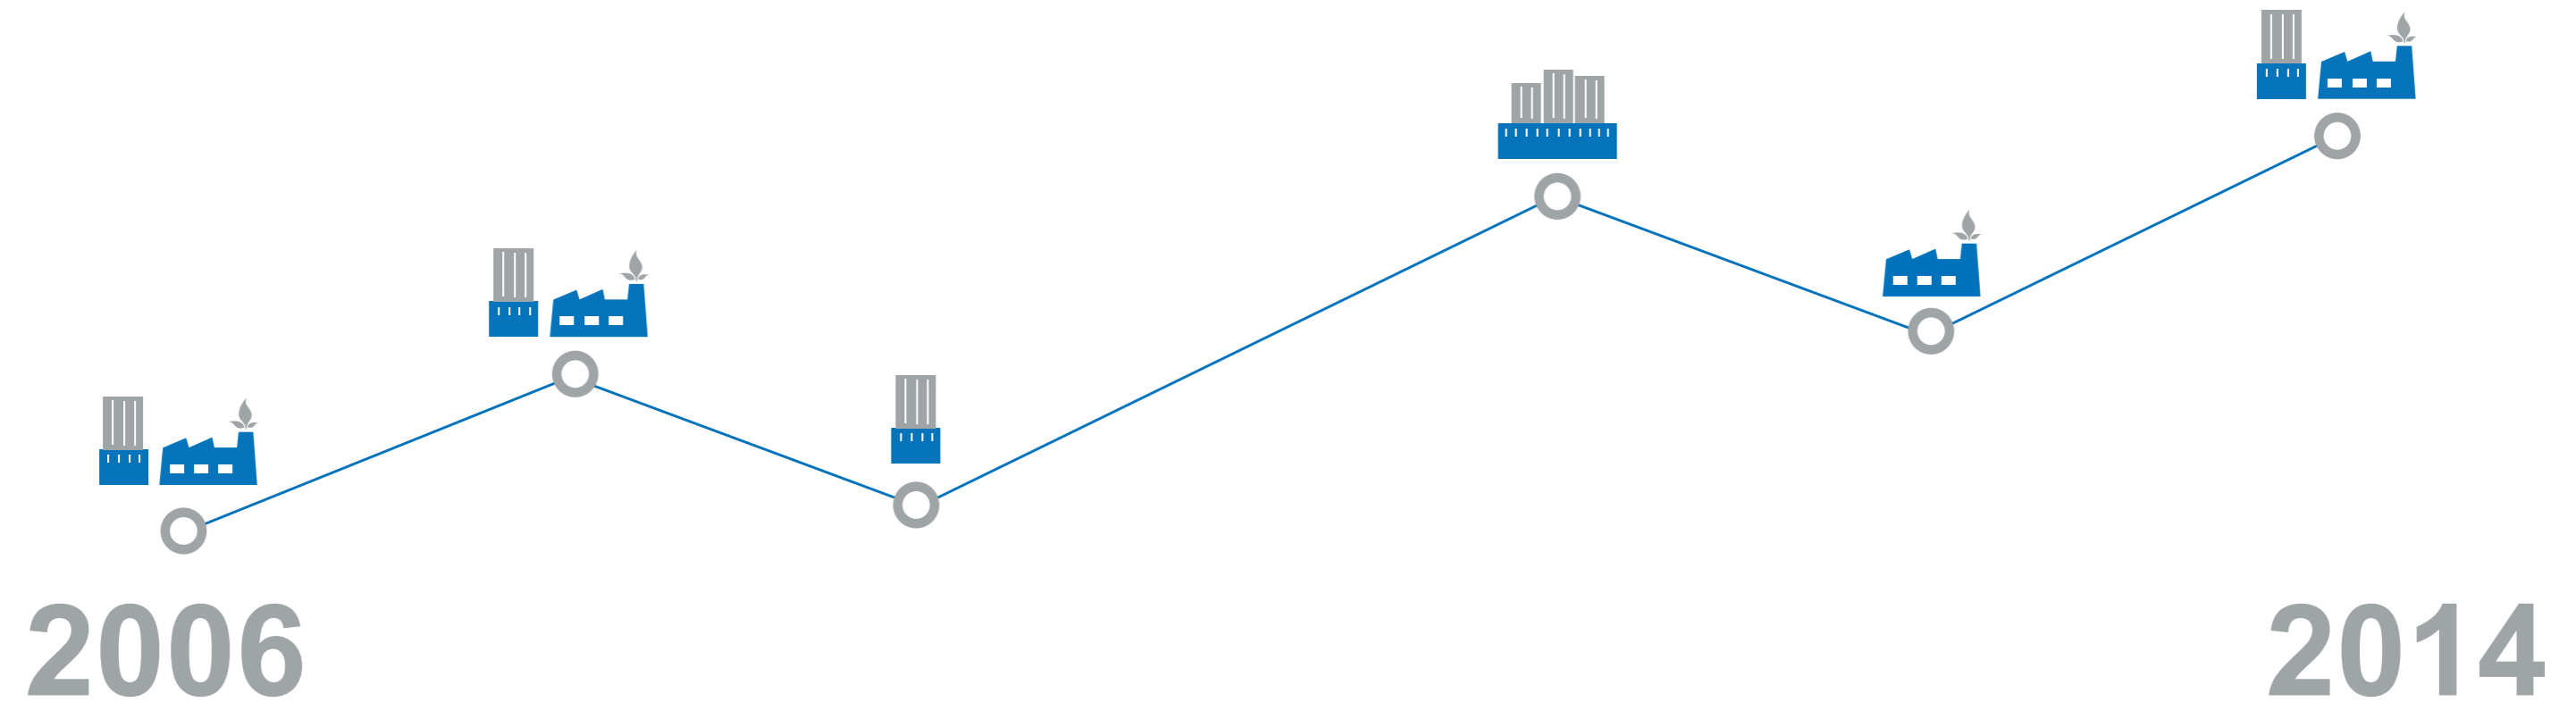

We embrace the practice of value creation for all stakeholders. We promote a friendly, nurturing and supportive working environment for our people, making us a second home for them. We drive to provide customers with excellent products and services. We orient our business to be in line with healthy community development and environmental sustainability.

OUR HISTORY

2006

2014

02 - 2006

Quang Hung Steel Ltd Co., was established
[Area] 500 m²

[Add] 3A/8 Hamlet 3, Pham Van Hai Commune,
Binh Chanh District, HCMC

08 - 2009

The Quang Hung Steel factory was established in & the headquarter was moved to Tan Tao Industrial Zone
[Area] 7.500 m²

[Add] Lot 11, Nuoc Len Street,
Tan Tao Industrial Zone, Binh Tan District,
HCMC

11 - 2009

QH Plus Japan was established
[Area] 100 m²

[Add] 3th floor, 22-14, 1-Chome, Kitahorie,
Osaka, 550-0014, Japan

03 - 2012

Quang Hung Steel Ltd. Co., was converted into QH Plus Corp., & the headquarter was moved to district 7, HCMC
[Area] 600 m²

[Add] R1-34, Hung Gia 5 Street,
Tan Phong Ward, District 7, HCMC

04 - 2013

QH Plus showroom & warehouse were established in Binh Chanh District
[Area] 3,099.8 m²

[Add] A3/19 Tran Dai Nghia Street,
Tan Kien Commune, Binh Chanh District,
HCMC

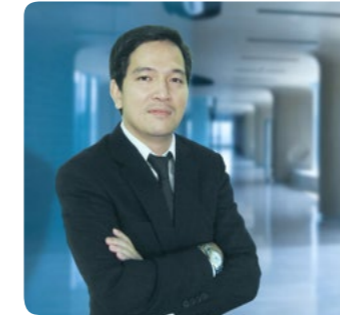

09 - 2013

QH Plus Industry JSC., was established & came into operation
[Area] 44,816 m²

[Add] N1 Street, Nhon Trach Textile Industrial Zone
Nhon Trach Commune, Dong Nai Province

Dear Valued Partners of QH Plus!

We would like to express our sincere gratitude for your contribution to our growth over the last eight years. From the initial function as a steel trader, QH Plus now becomes a reliable brand of steel products, construction accessories and interior/exterior decorative materials. We perceive these achievements to be of all of us.

With the trust customers place on us, we see that we need to devote more efforts to provide more solutions meeting the demands for human safety, process simplification, durability and cost efficiency. With all of our passion instilled in our offerings, we wish to contribute our resources and capabilities to the improvement of safety and modernity in the Vietnamese construction industry. We consider these objectives as our mission that must be completed.

It is our pleasure and pride to cooperate with you, who are highly professional and capable partners. We strongly believe that the immeasurable value of our integrity, credibility and respect does lay a strong foundation for the success of QH Plus today and the lasting partnerships between us. We hope that QH Plus together with you will build a robust construction industry and bring more practical values to the community in the future.

Dear Beloved Members of QH Plus!

QH Plus highly appreciates your dedication and enthusiasm leading QH Plus to the present achievements. Your efforts, ideas and dedication have been still highly recognized by QH Plus. In order to meet the increasingly high expectations and strict requirements of customers, besides integrity and care, we require you to embody a stronger spirit of passion and creativity in every piece of your work. QH Plus welcomes all of your creative work because stopping innovating also means refusing to satisfy our customers and halting our own development. Your personal qualities will be the critical ingredients that promote the sustainability and unique characters of QH Plus brand.

We wish your health, success and hapiness.

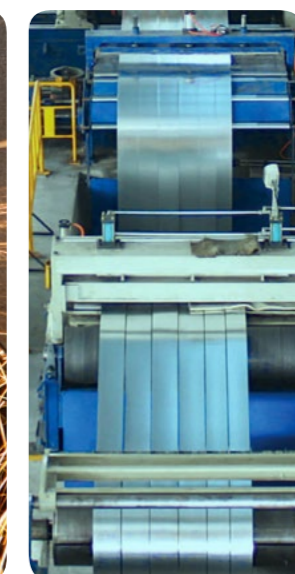

General Director

Nguyen Quang Huy

BUSINESS SCOPE

Not only being the leading distributor of steel products in Vietnam, QH Plus also attaches special importance to the expansion of its product portfolio with the aim of satisfying diverse demands of customers. In each field we operate, we always follow our own product philosophy which is to provide customers with innovative solutions enhancing the human safety in construction. To accomplish these objectives, we place a great value on human resources and continuously invest in advanced technology and infrastructure. Simultaneously, we concentrate our efforts on research and development activities so as to meet the increasingly strict requirements for the quality of our offerings.

CONSTRUCTION MATERIALS

Apart from extending the range of steel products, QH Plus also provides customers with many other construction materials consisting of steel fabrication, welded mesh, finishing materials for wall and floor systems.

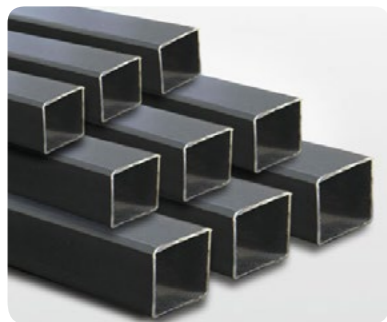

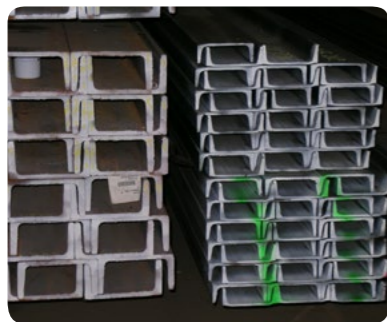

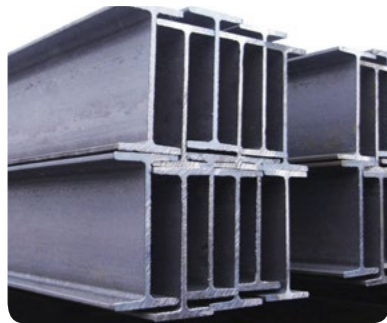

STEEL

Since its inception, QH Plus has been involved in trading a variety of steel products manufactured by reliable partners in Vietnam, South Korea and Japan, ensuring stable supply, competitive price and international standardized quality such as JIS, ASTM.

Steel coil, plate

1. Hot rolled steel (HRC, HRP, HRCP)
2. Cold rolled steel (CR, GA, EG)
3. Galvanized, Galvalume, Tinfree, Electrolytic Tinplate Steel Sheet (GI, GL, TFS, ETP)
4. Pre-painted steel (PPGI, PPCR, PPGL)

 Rebar, wire rod

- | | | | |
|------------------------|-----------|--------------|----------------------------------|
| 1. Round bar (RB) | 4. H beam | 7. U beam | 10. Tube black steel, galvanized |
| 2. Deformed bar (DBAR) | 5. I beam | 8. L beam | 11. Pipe black steel, galvanized |
| 3. Wire rod (WR) | 6. V beam | 9. Rail beam | 12. Steel purlins |

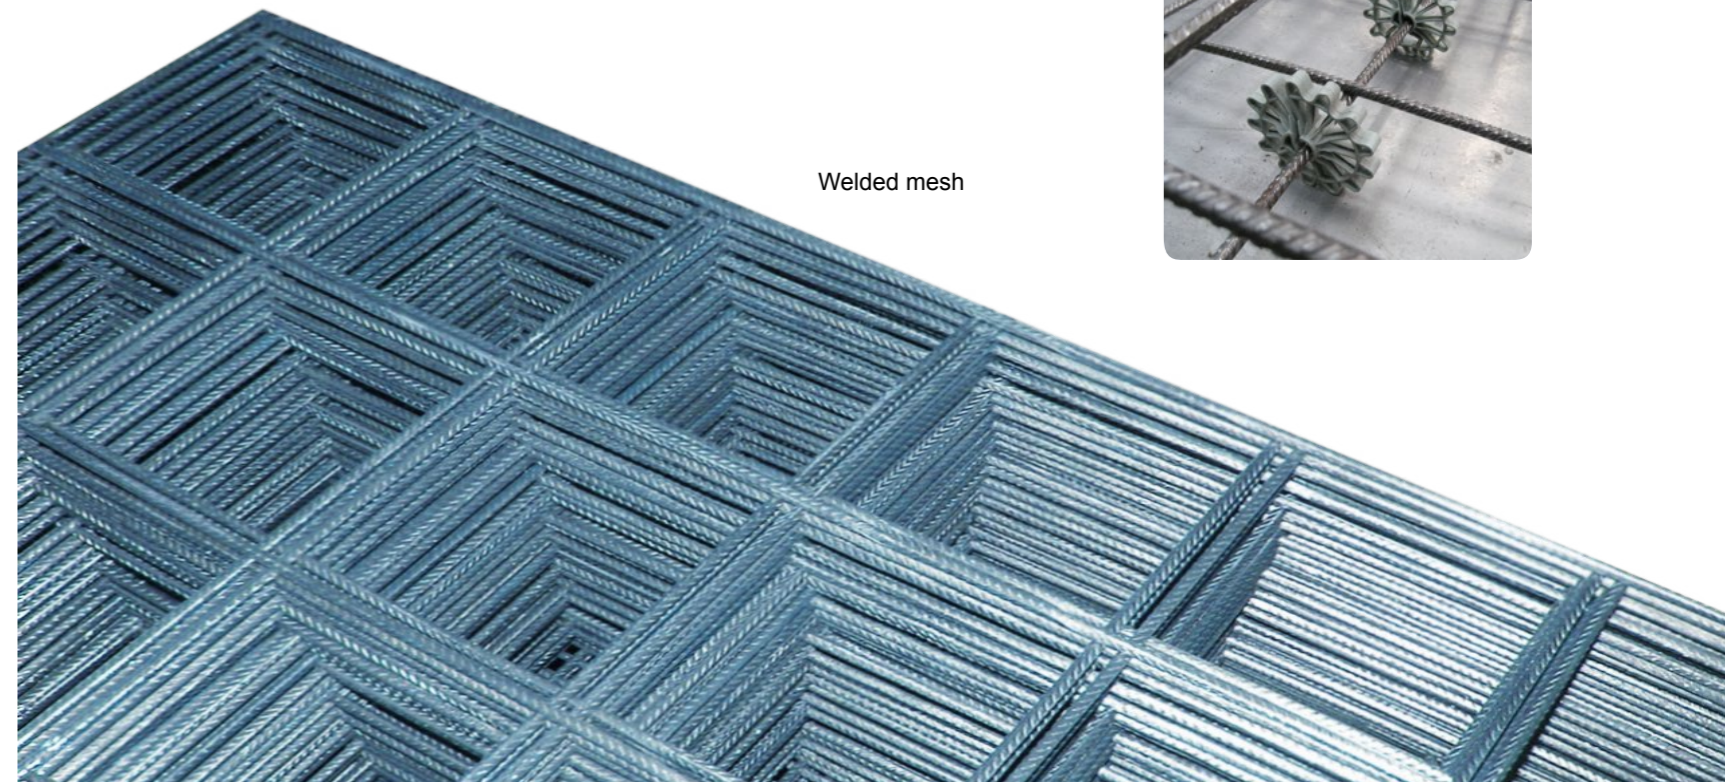

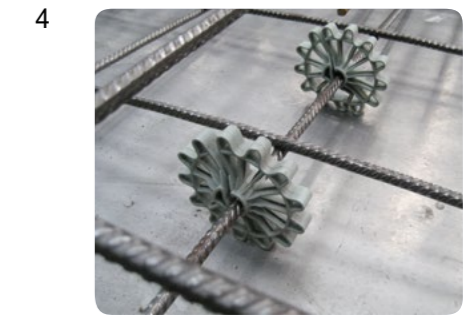

WELDED MESH

QH Plus utilizes resistive spot welding (RSW) technology to produce welded mesh meeting the requirements of high precision, quality and productivity. Deformed bars or wire rods are perpendicularly laid across a series of wires. High electrical current is then applied to melt the metal down and simultaneously clamp the sheet together at intersecting points.

- Ensuring the high precision and consistence in mesh spacing
- Reducing field labor and equipment leasing costs
- Replacing manually-produced mesh; thereby, saving time
- Enhancing adherence of reinforcement to concrete
- Avoiding losses and quality deterioration of steel at construction sites

QH Plus also supplies customers with complementary products helping position reinforcement more properly in concrete.

1. Wire mesh welding machine
2. Concrete spacer
3. Steel spacer
4. Plastic spacer

STEEL FABRICATION

QH Plus has been engaged in manufacturing a wide range of steel fabrication including industrial factories, commercial buildings and others customized by customers' requests.

- High speed of erection
- Large occupancy ratio
- Safety and convenience in use
- Ease of repair and expansion
- Reusable materials

INTERIOR AND EXTERIOR DECORATIVE MATERIALS

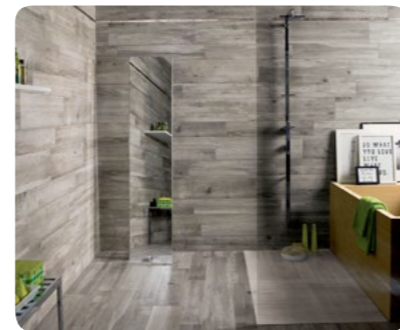

The demand for decorating working and living environments is increasingly high in the light of modernization. QH Plus embraces the practice of continuous innovation in order to provide customers with diverse choices of interior and exterior decorative materials made from the latest materials with high efficiency and beauty.

LIFTING SOLUTIONS

CONNECTING SOLUTIONS

CONSTRUCTION ACCESSORIES

With the desire to promote a healthy Vietnamese construction industry, QH Plus has been continuously striving for innovative, efficient and practical solutions.

- Promoting human safety in construction
- Reducing labor and material costs
- Quality meeting international specifications
- Shortening implementation time
- Simplifying implementation processes

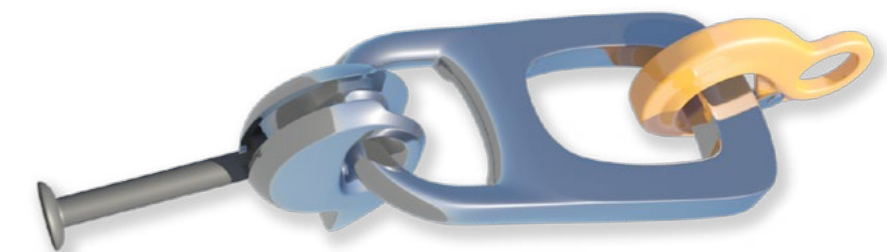

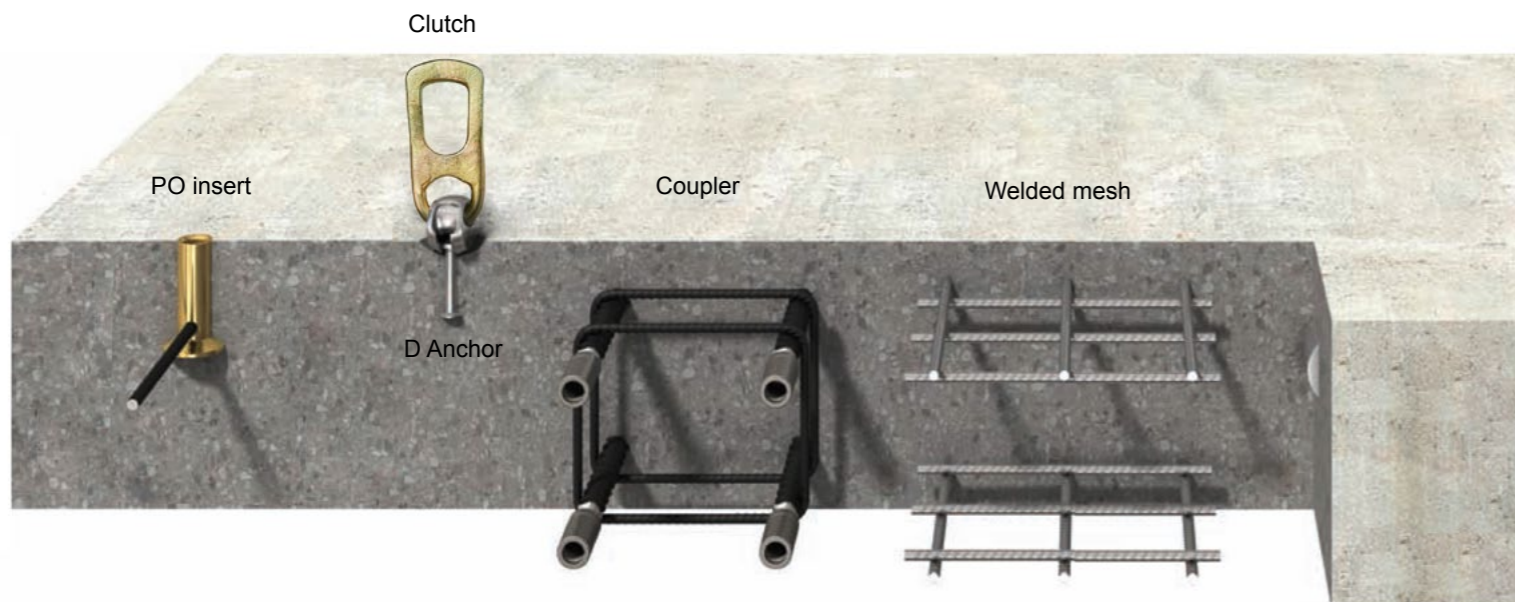

D Anchors are made for primary application of lifting precast concrete components

LIFTING AND CONNECTING SOLUTIONS

Recognizing the high physical risks in the current concrete lifting methods in Vietnam, QH Plus has imported techniques from developed nations such as Germany, Japan and then customized them in compliance with strict technical requirements to fit the demand for human safety in the domestic market.

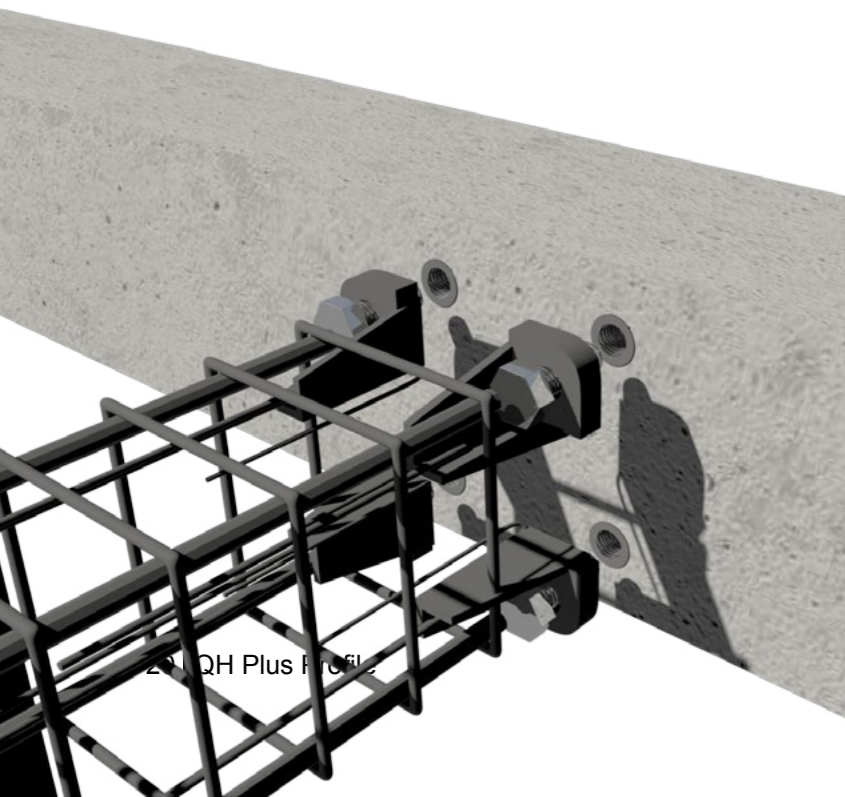

Additionally, QH Plus also supplies customers with many optimal solutions characterized by unique features leading to more safety and cost efficiency. These construction accessories widely vary in application including connecting, reinforcing and fastening building components.

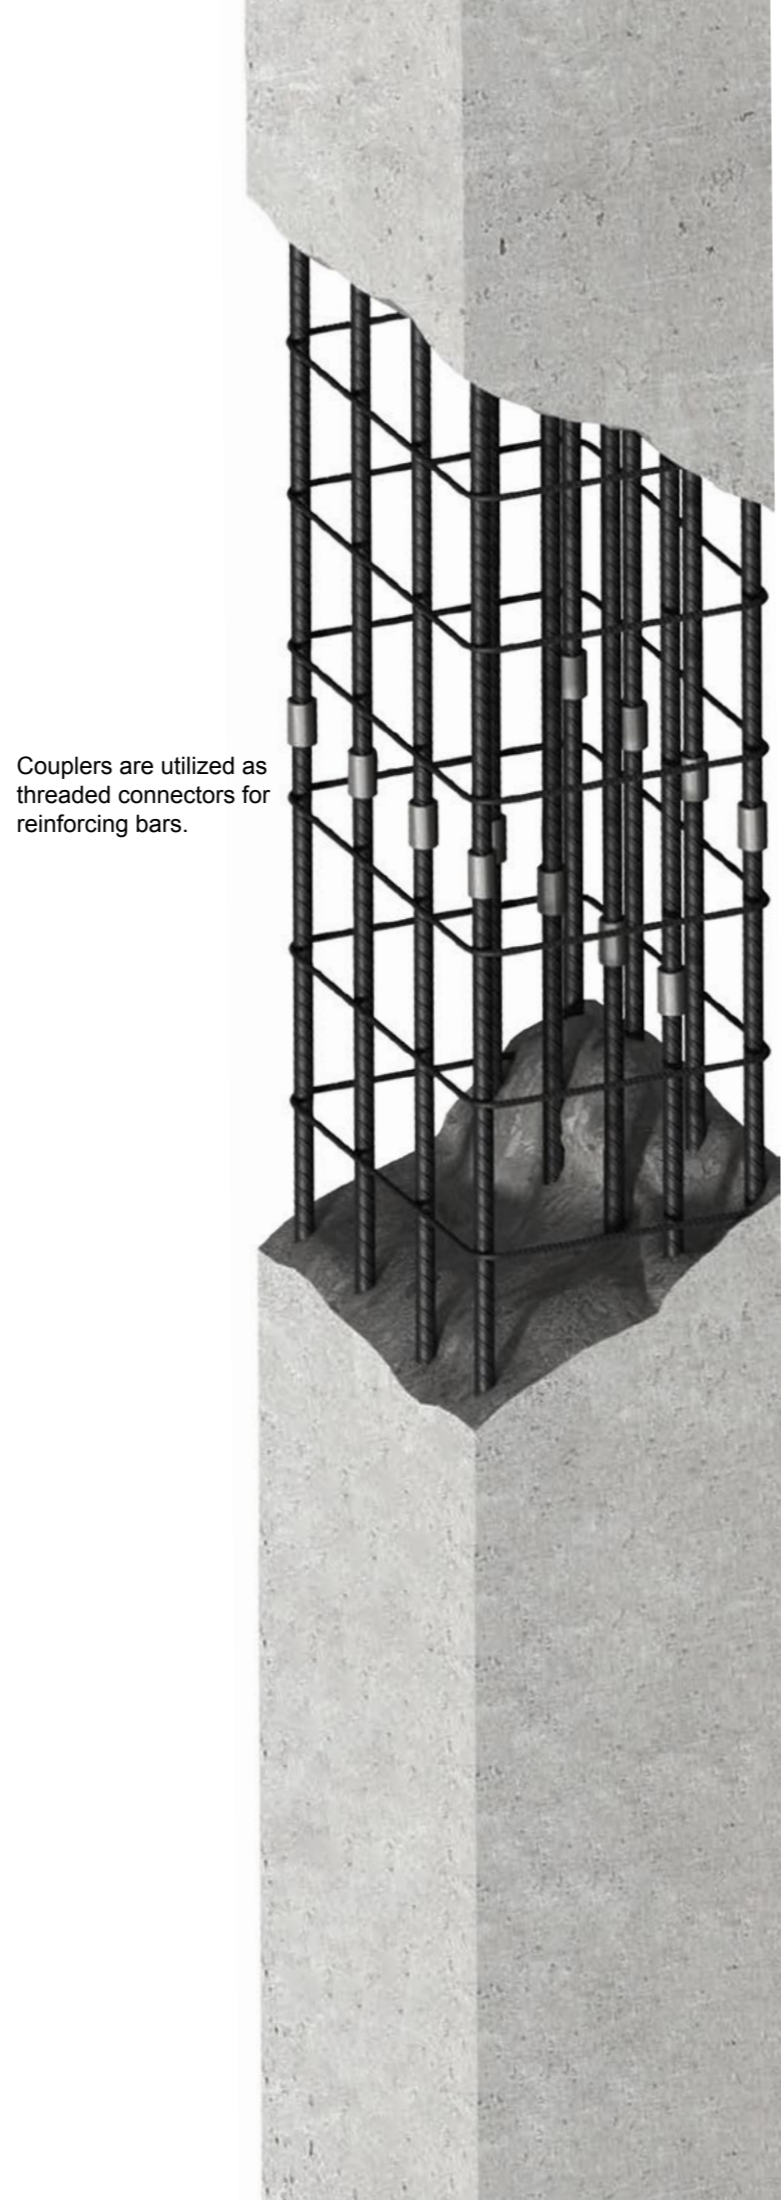

QH Inserts are made for multiple applications consisting of lifting and connecting precast concrete elements such as slabs, beams, etc.

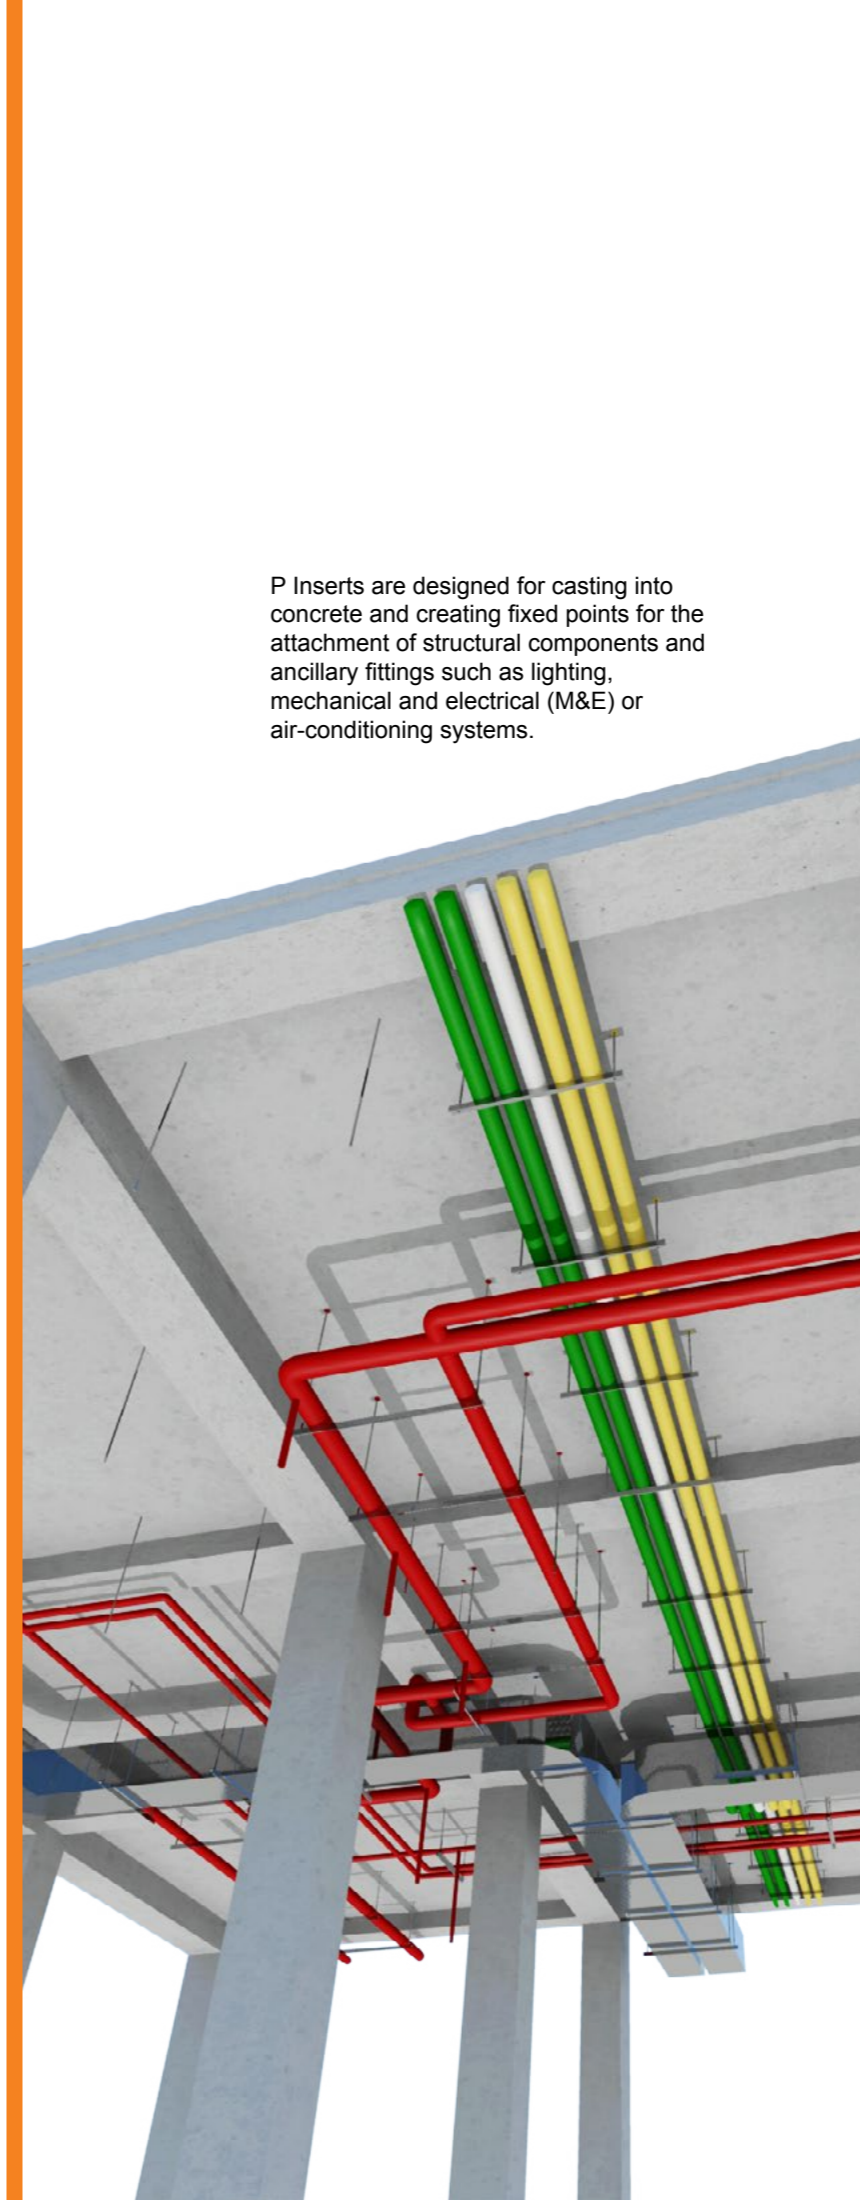

Precast slabs and beams are connected by QH Inserts.

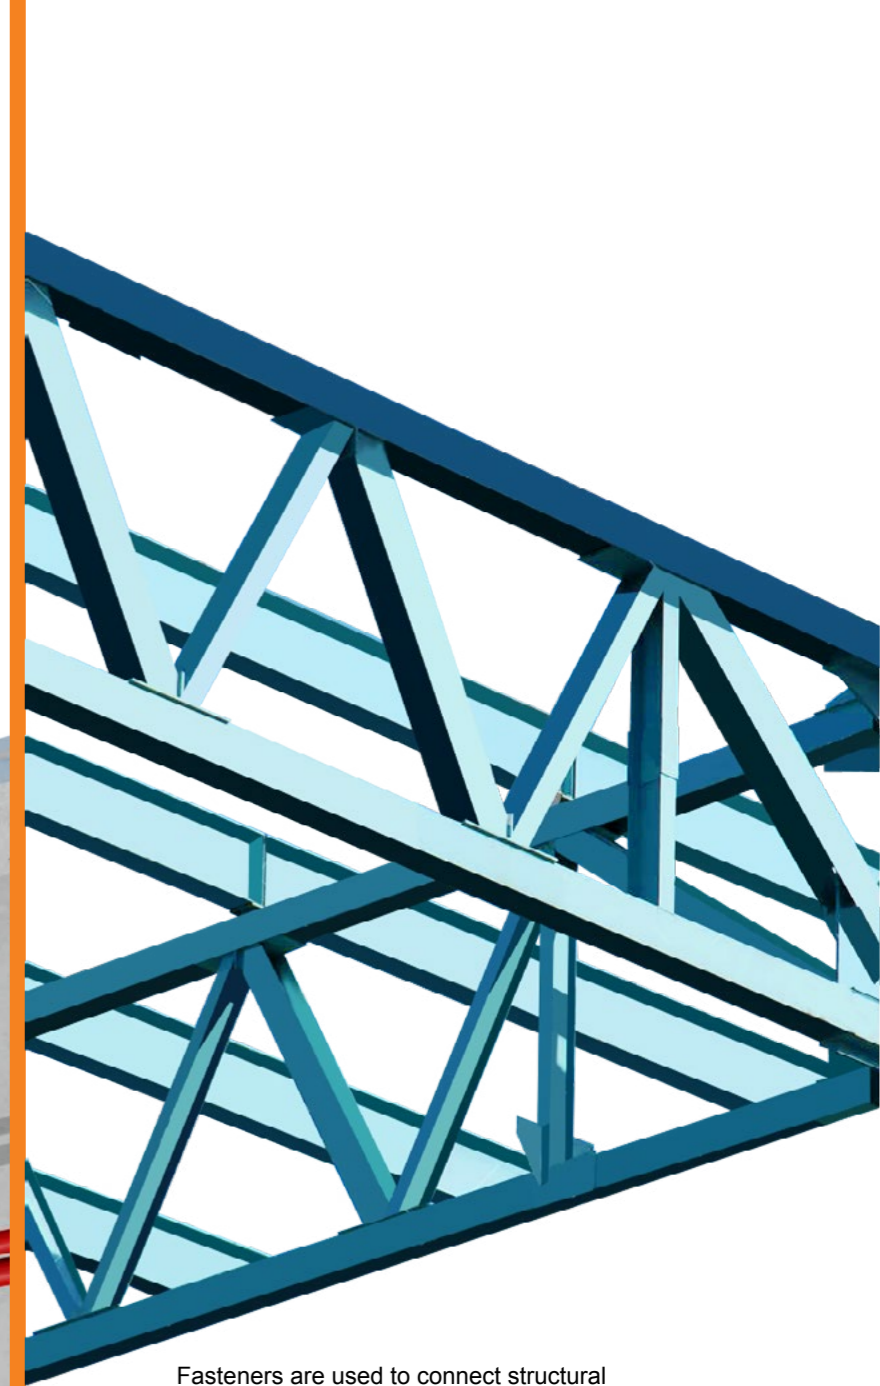

QH Plus Profile

Couplers are utilized as threaded connectors for reinforcing bars.

P Inserts are designed for casting into concrete and creating fixed points for the attachment of structural components and ancillary fittings such as lighting, mechanical and electrical (M&E) or air-conditioning systems.

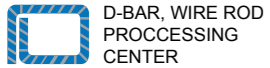

Fasteners are used to connect structural steel components.

COATING

SERVICES

In addition to the development of strategic products, QH Plus also invests in highly-qualified human resources, plant and infrastructure enabling us to provide steel-processing centers and electro galvanizing services with the intention of fulfilling customers' expectation.

STEEL PROCESSING CENTER

QH Plus offers slitting, shearing line services for steel coil and cutting, bending, stamping services for long steel (DBar, H Beam ...) in accordance with customers' requests. Equipping factory with advanced technology, controlling the production processes strictly, QH Plus ensures the great precision in all output and delivers in a timely manner.

COATING SERVICE

QH Plus provides customers with electro galvanizing services. The galvanization enables inner materials to be highly resistant to rust and corrosion and to have a satiny appearance; thereby, increase the durability of steel.

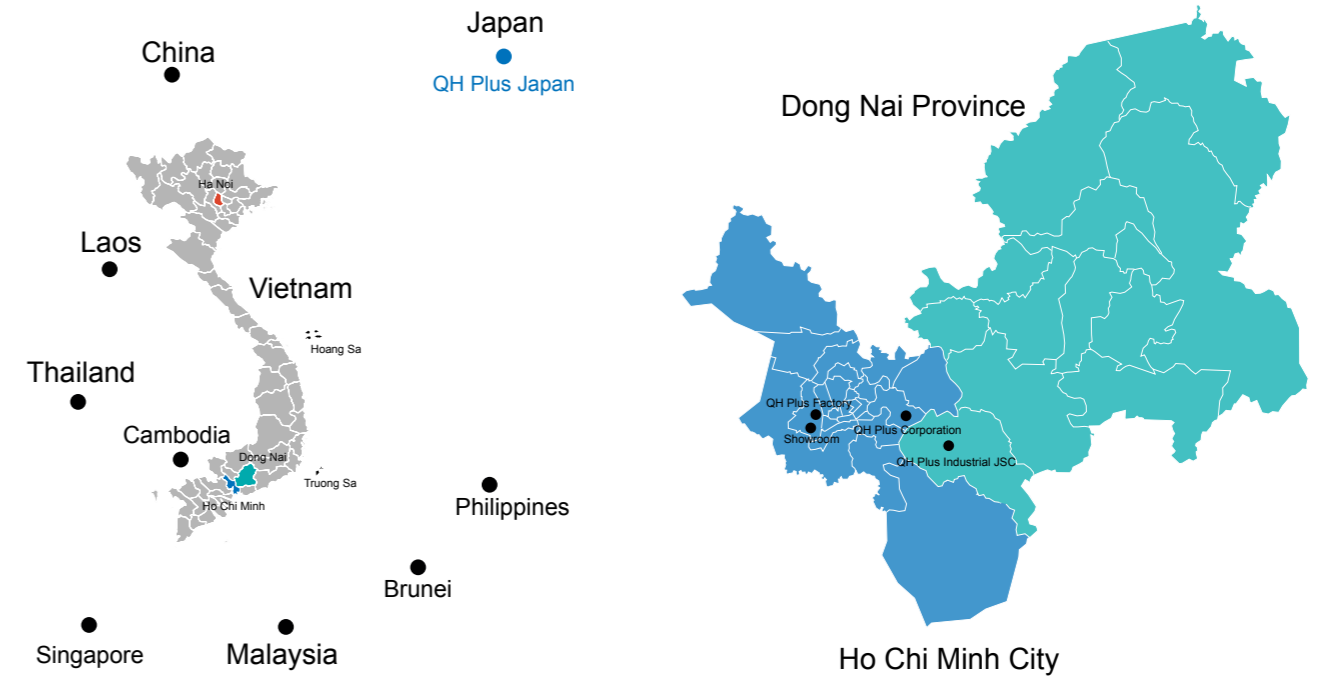

Your life would be nice...
if you are safe.
And...
We are building it,
For you, for me and for all of us...
